

## Atlanta Chapter

# Map Your Lean Transformation

Introducing the APICS Lean Enterprise Workshop Series

As more organizations decide to go lean, demand is escalating for a skilled team and system wide approach for developing and implementing lean project plans. This course is designed to equip you with the broad knowledge and tools to map the transformation for developing a lean culture at your organization.

The APICS Lean Enterprise Workshop Series is organized to enable you to approach and understand the lean transformation process systematically. Using scenarios from a fictitious company, Murphy's Toys, you will be tasked with finding lean solutions to a myriad of challenges. This method will provide you with the flexibility to immediately customize what you've learned and implement it at your own organization.

### There are seven workshops in the series:

- **Introduction**  
You will gain an overview of the many components of implementing a lean transformation in your organization and gauge your organization's readiness through a hands-on assessment.
- **Lean Culture**  
Explore the effects of a lean implementation on your employees and learn about the importance of teams. The Kaizen, a team-oriented continuous improvement event will be introduced in this section.
- **Value Stream Mapping**  
Learn about value stream mapping and this tool's value for viewing processes and determining potential areas of improvement. Draw a current state map and then learn about concepts to help you improve your future state.
- **Stability and Process Improvements**  
Learn how to improve process stability, achieve demand stability and improve manufacturing process efficiencies.
- **Just-in-Time**  
Determine customer demand, standard work, line balancing and many other tools to meet customer demand. Participants will explore the use of a heijunka system to meet customer demand through a hands-on activity.
- **Measuring**  
Review the way a lean company measures and aligns measurements with objectives. Topics include lean accounting, inventory costs, target costs and lead time.
- **Sustaining**  
Learn about the long-term changes to sustain the gains made. Topics include lean design, analyzing failures and ensuring ongoing quality control and continuous improvement.

### Take-Aways from the Workshop

- Complete a self-assessment to determine your organization's readiness to implement lean
- Gain practical experience analyzing how to incorporate lean into organizations
- Obtain broad knowledge of lean enterprise solutions
- Map a value stream
- Draft a detailed lean implementation plan for your organization, a project assignment to be discussed during the last day of the course

### Who should participate in the Lean Enterprise Workshop?

- Professionals seeking to map their Lean transformation process
- Change agents seeking to become Lean Leaders
- Companies on a journey to eliminate waste from their processes
- Workers on the Lean journey in order to profitably grow the business

**COST: Members - \$895**  
**Non-members - \$995**

**A \$100 Late Fee will be applied to reservation starting Tuesday, September 7**

*A Lean Certificate of Completion will be awarded to participants who meet the requirements at the end of the series.*
